Referred By:	د/ علي غراب		Reported date:	2026-03-07	

PATHOLOGY REPORT

Clinical Information.	Suspected ectopic tubal pregnancy.
Nature of specimen.	Salpingectomy

GROSS:

Fallopian tube measured 3.5x1.5 cm, distended by clotted blood.

MICROSCOPIC:

Fallopian tube shows fragments of degenerated decidua with immature edematous chorionic villi and associated severe interstitial hemorrhage. No evidence of fetal tissues. No evidence of tumors.

DIAGNOSIS:

Salpingectomy:

- Ectopic tubal gestation.
