## PATHOLOGY REPORT

Clinical Information.	Dysfunctional Uterine Bleeding, scheduled for an endometrial biopsy to determine the underlying cause.
Nature of specimen.	D & C biopsy.

### GROSS:

Soft tissue fragments collectively measured 1.8x1.3x0.8 cm, totally embedded.

### MICROSCOPIC:

Fragments of degenerated decidual tissue and chorionic villi with extensive hyalinization. Picture is consistent with retained degenerated products of conception. Other fragments showing proliferative endometrium. No evidence of tumors.

### DIAGNOSIS:

#### Uterine contents, D & C biopsy:

- Degenerated retained products of conception.
- Negative for tumors.
