

Pt. Name:	أسمهان هلال عبده الطاهر		Lab Number:	1452-2026	
Pt. Age:	22 years.	Gender:	Female	Received date:	2026-03-05
Referred By:	د/ منى غشيم		Reported date:	2026-03-09	

PATHOLOGY REPORT

Clinical Information.	Lt. tubal ectopic pregnancy.
Nature of specimen.	Salpin3

GROSS:

Fallopian tube measured 3x1 cm, having rubbery cut section. Received in the same container bloody soft tissue fragment measured 3x2 cm. All were totally embedded.

MICROSCOPIC:

Fallopian tube shows fragments of degenerated decidua with immature edematous chorionic villi and associated severe interstitial hemorrhage. No evidence of fetal tissues. No evidence of tumors.

DIAGNOSIS:

Salpingectomy:

- Ectopic tubal gestation.
