## PATHOLOGY REPORT

|                       |                          |
|-----------------------|--------------------------|
| Clinical Information. | Multiple fibroid masses. |
| Nature of specimen.   | Excision.                |

### GROSS:

Multiple well-circumscribed masses are identified, collectively measuring 13.0 × 11 × 5.5 cm. The largest mass measures 7.5 × 6 × 5.5 cm, while the smallest measures 0.8 cm in greatest dimension. On cut section, the masses display a rubbery, whitish appearance.

### PHOTOGRAPH

### MICROSCOPIC:

Myometrial tumors are benign leiomyomas formed of whorly bundles of mature smooth muscles separated by a fibrous stroma. Two leiomyomas are moderately cellular with few mitotic figures. No evidence of tumor necrosis. No evidence of atypia or malignancy.

### DIAGNOSIS:

#### Uterine myomectomy:

- Leiomyomas (two are cellular leiomyoma)
- Negative for malignancy
