PATHOLOGY REPORT

Clinical Information.	Endometrial thickening.
Nature of specimen.	D & C biopsy.

GROSS:

One soft tissue fragment measured 2x1.3x0.7 cm, totally embedded.

MICROSCOPIC:

Fragments of extensively degenerated decidualized endometrial stroma. However, no evidence of chorionic villi, fetal membranes or other conception products. No evidence of tumors.

DIAGNOSIS:

D & C biopsy:

- Degenerated decidual tissue.
- Negative for tumors.

Pathologist

Prof. Dr. Neveen Tahoun, MD, PhD
