PATHOLOGY REPORT

Clinical Information.	Turbid ascitic/pelvic fluid aspirated from a patient with a history of DM, chronic liver disease, renal failure and HCV+, following a recent strangulated hernia repair.
Nature of specimen.	Ascitic fluid for cytology

GROSS:

One slide was prepared and stained from submitted 30 ml turbid yellow fluid.

MICROSCOPIC:

Smear show dense population of neutrophils with some small lymphocytes as well as many cell debris. No evidence of atypical or malignant cells.

DIAGNOSIS:

Ascitic fluid, cytology:

- Marked (suppurative) inflammatory changes.
- Negative for malignant cells.
- Category II according to The International System for Reporting Serous Fluid Cytology, ISRSFC.
