PATHOLOGY REPORT

Clinical Information.	Vaginal bleeding with endometrial polyp.
Nature of specimen.	D and C biopsy

GROSS:

Soft tissue fragments collectively measured 1.7x1.3x0.7 cm, totally embedded.

MICROSCOPIC:

Fragmented polypoid lesion formed of non-secretory hyperplastic endometrium, it is formed of branching glands exhibiting moderate cystic dilatation with focal crowding. Glands are lined by 1-3 layers of cells. Stroma is compact with scattered thick walled blood vessels. No evidence of complex pattern, atypia or malignancy.

DIAGNOSIS:

Endometrial polypectomy:

- Hyperplastic endometrial polyps.
- Negative for atypia or malignancy.
