Referred By:	د / عبد السلام الحكيمي		Reported date:	2026-04-10	

PATHOLOGY REPORT

Clinical Information.	Breast discharge.
Nature of specimen.	Exfoliative cytology.

GROSS:

Three unstained smears were submitted and stained with pap.

MICROSCOPIC:

Smears showing a mild number of lymphocytes and neutrophils. There are scattered papillary clusters of hyperplastic ductal cells. The main possibility of this lesion is an intraduct papillomatosis or papilloma. Confirmatory excision of the affected duct system is advised.

DIAGNOSIS:

Nipple discharge, cytology:

- Hyperplastic papillary clusters of ductal cells, consistent with duct papillomatosis.
- Negative for malignant cells.
