PATHOLOGY REPORT

Clinical Information.	Referred block for immunostaining of biopsy from pelvic mass, previously submitted and diagnosed as cellular spindle cell tumor on 22 January 2026 (pathology number 390-2026).
Nature of specimen.	Immunohistochemistry.

GROSS:

One referred paraffin block and one H&E slide of previously submitted case with pathology number 390-2026.

MICROSCOPIC:

Cellular tumor composed of proliferating spindle cells arranged in intersecting fascicles and whorly bundles, featuring focal nuclear palisading. Tumor cells exhibit elongated, blunt-ended nuclei with mild anaplasia and low mitotic activity.

Immunostaining was done with appropriate positive and negative controls and revealed:

- **CD117:** diffuse positive reaction in tumor cells.
- **DOG1:** negative in tumor cells.
- **SOX10:** negative in tumor cells.
- **S100:** negative in tumor cells.
- **SMA:** diffuse positive reaction in tumor cells.
- **H-Caldesmon:** negative in tumor cells.
- **Ki-67** labeling index about 2%.

DIAGNOSIS:

Immunostaining of pelvic mass biopsy:

- Confirmatory of Gastrointestinal Stroma tumor.
