PATHOLOGY REPORT

Clinical Information.	Right ovarian cyst.
Nature of specimen.	Right ovarian cystectomy.

GROSS:

Intact right ovarian cyst measuring 13 x 9 x 8 cm with an attached 9 cm fallopian tube. The cyst has a smooth outer surface, and upon cut section, it revealed a single large cavity filled with yellowish fluid.

MICROSCOPIC:

Fibrotic cyst wall showing coverage by non-mucigenic cuboidal cells. No evidence of epithelial piling up or stromal invasion. No evidence of atypia or malignancy.

DIAGNOSIS:

Rt. Ovarian cystectomy:

- Simple serous cyst.
- Negative for malignancy.
