PATHOLOGY REPORT

Clinical Information.	Patient presenting with a 1.5-month history of continuous bleeding, for which a cervical sample was taken for histopathological examination.
Nature of specimen.	Biopsy

GROSS:

Soft tissue fragment measured 3x1.3x0.7 cm, totally embedded.

MICROSCOPIC:

Fragments of degenerated decidual tissue and chorionic villi with extensive hyalinization. Picture is consistent with retained degenerated products of conception. No evidence of tumors.

DIAGNOSIS:

Uterine Cervix, biopsy:

- Degenerated retained products of conception.
- Negative for tumors.
