PATHOLOGY REPORT

Clinical Information.	Known case of Rheumatoid Arthritis presenting with right knee swelling, redness, and heat, raising clinical suspicion of septic arthritis.
Nature of specimen.	Right knee FNAC

GROSS:

One smear was prepared and pap stained from submitted 30 ml creamy-brown fluid.

MICROSCOPIC:

Smear showing abundance of neutrophils with many cell debris, few lymphocytes and macrophages. No evidence of crystals. No evidence of specific granulomas. No evidence of malignancy.

DIAGNOSIS:

Right knee FNAC:

- Marked inflammatory changes (septic arthritis).
- Negative for atypical cells.
