PATHOLOGY REPORT

Clinical Information.	Multilocular ovarian cyst.
Nature of specimen.	Salpingo-oophorectomy

GROSS:

Ovary measuring 4.5 x 3.5 x 3 cm and an attached fallopian tube measuring 5 cm long. The outer surface was smooth. Sectioning of the ovary revealed a cyst measuring 1.5 x 1 cm.

MICROSCOPIC:

Sections show cyst lined by several layers of polygonal luteinized cells with interstitial hemorrhage into wall. Fallopian tube is unremarkable. No evidence of atypia or malignancy.

DIAGNOSIS:

Salpingo-oophorectomy:

- Hemorrhagic luteal cyst.
- Unremarkable fallopian tube.
- Negative for malignancy.
