Referred By:	o.p		Reported date:	2026-05-10	

PATHOLOGY REPORT

Clinical Information.	Excision of a lesion in the right big toe.
Nature of specimen.	Excision

GROSS:

Soft tissue piece measuring 1 x 0.8 x 0.6 cm, totally embedded

MICROSCOPIC:

Sections show intact hyperplastic and acanthotic stratified squamous epithelium with marked hyperkeratosis but no related dermis. No evidence of inflammation. No atypia or malignancy.

DIAGNOSIS:

Right big toe lesion, excision:

- Hyperkeratosis (Callosity)
- Negative for malignancy.
