PATHOLOGY REPORT

| | |
|------------------------------|---|
| Clinical Information. | Postmenopausal endometrial hyperplasia. |
| Nature of specimen. | Panhysterectomy. |

GROSS:

Panhysterectomy specimen; Uterus 8.5x6.5x4.5 cm with 2.3 cm thick wall focal trabeculation and intracavitary polyp 2.7x2 cm Cervix is 3 cm long. Ovaries are 2x1.5 cm each, grossly unremarkable. Fallopian tubes are 5 cm long, each.

MICROSCOPIC:

Intracavitary polyp and endometrium is non-secretory and hyperplastic, it is formed of branching glands exhibiting focal moderate crowding and lined by 1-3 layers of cells. Glands show focal complexity of their contour. Stroma is cellular and showing thick wall blood vessels. Islands of these endometrial glands and stroma are seen entrapped deep within myometrium. Ovaries, fallopian tubes and cervix are all unremarkable. No evidence of specific granulomas. No evidence of atypia or malignancy.

DIAGNOSIS:

Panhysterectomy:

- Moderate adenomatous (complex) endometrial hyperplasia. Negative for atypia.
- Hyperplastic endometrial polyp.
- Deep adenomyosis.
- Ovaries, fallopian tubes and cervix are unremarkable.
- Negative for malignancy.
