| Referred By: | حبيبة غرسان              |         | Reported date: | 2026-05-21     |            |

## PATHOLOGY REPORT

|                       |   |
|-----------------------|---|
| Clinical Information. | One referred paraffin block for immunostaining of valvul ulcer diagnosed as dense dermal lymphoid infiltrate recommended for marker study (pathology number 3285-2026, on 14 May 2026). |
| Nature of specimen.   | Immunostaining  |

### GROSS:

One referred paraffin block.

### MICROSCOPIC:

Immunostaining was done with appropriate positive and negative controls and revealed:

- CD43, CD34, CD117, MPO diffusely positive.
- CD68 KPI focally positive.
- CD20 and CD3 stained reactive B & T lymphocytes, respectively.
- ALK stained few cells.
- CD138 negative.
- Ki-67 labeling index about 70%.

### DIAGNOSIS:

#### Vulval ulcer, biopsy, immunostaining:

- Myeloid sarcoma.

### COMMENT:

- Examination of peripheral blood and bone marrow is recommended to exclude concomitant myeloid leukemia.
