PATHOLOGY REPORT

Clinical Information.	One referred paraffin block for PDL-1 of tongue lesion diagnosed as invasive squamous cell carcinoma, well differentiated (previous pathology number 25-N2549).
Nature of specimen.	Immunohistochemistry.

GROSS:

One referred paraffin block.

MICROSCOPIC:

A papillary tumor formed of fronds covered by non-keratinized stratified squamous epithelium. Core is fibrotic and vascular. No evidence of atypia or malignancy.

DIAGNOSIS:

Tongue lesion, excision, immunostaining:

- Benign squamous cell papilloma.
- PD-1 show focal positivity in scattered lymphocytes (internal control) with no significant epithelial expression.
- PDL1- immunostaining shows negative membranous staining for the lesional epithelium CPS<1 (negative).
- Findings do not support significant PD-1/PDL1 axis activation in this lesion.
