PATHOLOGY REPORT

Clinical Information.	synovial fluid for cytology.
Nature of specimen.	Synovial fluid for cytology

GROSS:

One smear was prepared and stained from submitted 10 ml reddish fluid with pus.

MICROSCOPIC:

Smear is hemorrhagic and shows a marked acute inflammatory exudate composed predominantly of neutrophils, along with few lymphocytes and scattered histiocytes. No specific granulomas are identified. There is no cytologic evidence of atypia or malignancy.

DIAGNOSIS:

Synovial fluid, conventional cytology:

- Marked acute (suppurative) inflammation, consistent with septic arthritis.
- Negative for malignant cells.
