PATHOLOGY REPORT

Clinical Information.	Menorrhagia.
Nature of specimen.	Myomectomy.

GROSS:

Two fibroid masses measuring 9.5x8.5x6.5 cm and 2x1.5x1 cm, both having solid rubbery whitish cut section.

MICROSCOPIC:

Moderately cellular myometrial tumors formed of whorly bundles of mature smooth muscles separated by a fibrous stroma. Few mitotic figures are observed. There is no evidence of tumor necrosis, atypia or malignancy.

DIAGNOSIS:

Myomecyomies:

- Cellular leiomyoma.
- Negative for malignancy.
- Recommended for follow-up.

COMMENT:

The majority of these tumors will behave in a benign fashion. However, some will show a more aggressive behavior; hence, a long-term follow-up policy is advised.
