PATHOLOGY REPORT

Clinical Information.	Paraovarian cyst.
Nature of specimen.	Excision

GROSS:

Received intact ovarian cyst measured 8.5x7x6.5 cm, filled with yellowish fluid, with attached part of fallopian tube measured 3.5 cm.

MICROSCOPIC:

A paratubal cyst having a thin fibrotic wall and is lined by a single layer of tubal-type ciliated epithelium (hydatid cyst of Morgagni). No evidence of atypia or malignancy.

DIAGNOSIS:

Paraovarian cyst, excision:

- Inclusion cyst of Morgagni.
- Negative for malignancy.
