Pt. Age:	Adult.	Gender:	Female	Received date:	2026-06-07
Referred By:	د/ يسرى الدومري		Reported date:	2026-06-09	

PATHOLOGY REPORT

Clinical Information.	Ectopic pregnancy
Nature of specimen.	Salpingectomy

GROSS:

Fallopian tube measured 4x1.2cm, having brownish cut section, totally embedded.

MICROSCOPIC:

Fallopian tube shows fragments of degenerated decidua with immature edematous chorionic villi and associated severe interstitial hemorrhage. No evidence of fetal tissues. No evidence of tumors.

DIAGNOSIS:

Salpingectomy:

- Ectopic tubal gestation.
- Negative for tumors.
