

Pt. Name:	ليمة عبد الكريم أحمد شويعة		Lab Number:	0275-2026	
Pt. Age:	28 years.	Gender:	Female	Received date:	2026-01-15
Referred By:	د/ يسرى طه		Reported date:	2026-01-20	

PATHOLOGY REPORT

Clinical Information.	Recurrent abortion.
Nature of specimen.	Placental tissue.

GROSS:

Placenta measured 12x10x2.5 cm, with attached membrane 11x8 cm, and attached cord 25 cm.

PHOTOGRAPH

MICROSCOPIC:

Placenta shows unremarkable histologic features, no evidence of infarcts, calcification, villitis or amnionitis. No evidence of viral inclusions or other inflammations. Umbilical cord shows a preserved three-vessel structure.

DIAGNOSIS:

Placenta and umbilical cord:

unremarkable histologic features.
