PATHOLOGY REPORT

Clinical Information.	Healthy cervix.
Nature of specimen.	Referred slides of pap smear for cytology for review and liquid base cytology.

GROSS:

Submitted 2 pap stained slides, coded 1909 and additional three liquid base preparations were made.

MICROSCOPIC:

Smears (referred and newly prepared ones) show unremarkable squamous cells, satisfactory for evaluation with present endocervical / transformation zone components. There is associated mild inflammatory changes without identified clue cells. No evidence of fungal, viral or trichomonal infection. No evidence of atypical or malignant cells.

DIAGNOSIS:

Pap smear, liquid base cytology and referred smears for review:

- Satisfactory for evaluation.
- Negative for intraepithelial lesion or malignancy (NILM).
- Organisms: None.
- Mild neutrophilic infiltrate.
- Clue cells are not identified.
