PATHOLOGY REPORT

Clinical Information.	Lt. lower eyelid lesion.
Nature of specimen.	Excision

GROSS:

Skin ellipse measuring $2.3 \times 2 \times 0.7$ cm, showing an ulcerated grey lesion measuring $1.8 \times 1.5 \times 0.5$ cm.
The lesion is 0.3 cm from the deep and medial margins, and 0.2 cm from the superior, inferior, and lateral margins.

MICROSCOPIC:

- Procedure: Excision.
- Tumor Type: Infiltrative basal cell carcinoma
- Tumor Site: Left lower eyelid.
- Tumor Size : $1.8 \times 1.5 \times 0.5$ cm.
- Lymph-vascular invasion: Not identified (Negative).
- Perineural invasion: Not identified (Negative).
- Depth of invasion: 0.5 cm cm.
- Margins: Negative.
- Pathologic Stage: pT1NxMx.

DIAGNOSIS:

Lt. lower eyelid lesion, excision:

- Infiltrative basal cell carcinoma, pT1NxMx
- Margins of excision are free of tumor infiltration.
