PATHOLOGY REPORT

Clinical Information.	Scalp abscess.
Nature of specimen.	FNAC

GROSS:

Two unstained smears were submitted and pap stained.

MICROSCOPIC:

Smears show a marked number of neutrophils and small lymphocytes with many cell debris and scattered histocytes. No evidence of atypical or malignant cells.

DIAGNOSIS:

Scalp lesion, FNAC

- Marked (suppurative) inflammatory changes with abscess formation.
- Negative for malignant cells.

Pathologist
