

Pt. Name:	آلاء ياسر عبد الصمد العبسي		Lab Number:	5964-2025	
Pt. Age:	20 years.	Gender:	Female	Received date:	2025-12-29
Referred By:	د/ أماني عجلان		Reported date:	2026-01-04	

### PATHOLOGY REPORT

Clinical Information.	Irregular menstruation. D & C biopsy.
Nature of specimen.	D & C.

#### GROSS:

Two soft tissue pieces collectively measured 3x2x1 cm and were totally embedded.

#### MICROSCOPIC:

Fragments of decidualized endometrial stroma with entrapped glands. The latter are disordered proliferative. The non-secretory glands are focally branching. Such changes may be produced by irregular hormone therapy or a persistent corpus luteum. No evidence of atypia or malignancy.

#### DIAGNOSIS:

##### D & C Biopsy:

- Irregular gland-stromal maturation with stromal decidualization
- Negative for malignancy.

#### Pathologist

Prof. Dr. Neveen Tahoun, MD, PhD
