Referred By:	د/ زارينا		Reported date:	2026-02-08	

## PATHOLOGY REPORT

Clinical Information.	Cervical polyp.
Nature of specimen.	Cervical polypectomy.

### GROSS:

Soft tissue fragments collectively measured 1.5x1x0.7 cm.

### MICROSCOPIC:

Submitted curette is dominantly formed of mucous with some fragments of unremarkable ectocervical and endocervical epithelium. No evidence of atypia or malignancy.

### DIAGNOSIS:

#### Cervical polypectomy:

- Mucous with unremarkable endocervical and ectocervical epithelium, consistent with Nabothian cyst.
- Negative for malignancy.
