Pt. Age:	38 years.	Gender:	Female
Received date:		Reported date:	2026-02-12
Referred By:	د/ عبدالحكيم المتوكل		

## PATHOLOGY REPORT

Clinical Information.	Gastric giant ulcers at fundus extending to the body.
Nature of specimen.	Immunohistochemistry.

### GROSS:

One paraffin and one H&E slide (of previously submitted biopsy: 0803-2026) for immunohistochemistry.

### MICROSCOPIC:

Immunostains were performed with appropriate positive and negative controls:

- **Pan-Cytokeratin (AE1/AE3):** Positive in tumor cells.
- **LCA:** Negative in tumor cells.
- **CD20:** Negative in tumor cells.
- **CD68:** Negative in tumor cells.

### DIAGNOSIS:

#### Stomach, endoscopic biopsy :

- Poorly cohesive carcinoma with signet ring cell differentiation.

### Pathologist

Prof. Dr. Neveen Tahoun, MD, PhD
