PATHOLOGY REPORT

Clinical Information.	Panhysterectomy
Nature of specimen.	Panhysterectomy.

GROSS:

Panhysterectomy specimen; uterus measures 8x6x3.5 cm with trabeculated myometrium having thickness of 1.7 cm showing and endometrial thickness of 0.5 cm. Cervix is 2.5 cm, long. The Rt. And Lt. ovaries measured 3x1.5x1 cm and 2.3x1.3x1 cm. The Rt. ovary showed unilocular cyst measured 1.5x1. 2 cm. The right and left fallopian tubes measured 5 cm and 6 cm, and are grossly unremarkable

MICROSCOPIC:

Endometrium shows hyperplastic endometrial glands, is non-secretory, it is formed of slightly branched glands lined by 1-2 layers of cells. Stroma is cellular. No evidence of complex glandular pattern. Some of the hyperplastic endometrium are seen embedded within deep myometrium. Cervix shows Nabothian cysts with mild endocervicitis. Both ovaries shows cystic follicles and corpora albicans. Fallopian tubes are unremarkable. No evidence of atypia or malignancy.

DIAGNOSIS:

Panhysterectomy:

- Moderate simple endometrial hyperplasia without atypia
- Deep adenomyosis
- Cervical Nabothian cysts and mild endocervicitis.
- Ovarian cystic follicle and corpora albicans.
- Fallopian tubes are unremarkable.
- Negative for malignancy.
