Pt. Age:	25 years.	Gender:	Female
Received date:		Reported date:	2026-02-24
Referred By:	د/ غنية الصلاحي		

## PATHOLOGY REPORT

Clinical Information.	Ectopic pregnancy.
Nature of specimen.	Salpingectomy

### GROSS:

???????

The received specimen consists of a gestational sac measuring 5 x 4.3 x 4 cm with an attached fallopian tube measuring 4 x 0.5 cm. The outer surface of the specimen is smooth. There is a distinct hemorrhagic (bloody) area measuring 2 cm in maximum dimension, as well as a cyst measuring 3.5 x 3 cm that is filled with yellowish fluid. A grossly identifiable fetus is present, with its head measuring 0.6 cm and its leg measuring 0.7 cm.

### MICROSCOPIC:

Fallopian tube shows fragments of degenerated decidua with immature edematous chorionic villi and associated severe interstitial hemorrhage. Bone fragments are identified. No evidence of tumors.

### DIAGNOSIS:

#### Salpingectomy:

- Ectopic tubal pregnancy.
- Negative for tumors.
